## Gusts

# Hazardous Weather

## Thunderstorm Chances Continue Throughout the Weekend into Monday

- A strong ridge of high pressure over the Four Corners region will bring northwest flow around the clockwise spin of the high
- This set up is favorable for thunderstorms across the South Plains
- Dewpoints will stay relatively high throughout the weekend... providing ample moisture for any storms that do develop
- Some storms may produce local heavy rain and lightning

347 AM CDT  
Sat Jun 27 2015  
National Weather Service  
Lubbock, TX

Chances of rain are in store throughout the weekend, with warm and muggy conditions. A drying trend is expected by Tuesday.

## Saturday

East to Southeast  
Winds 10-20 mph

Scattered  
Thunderstorms

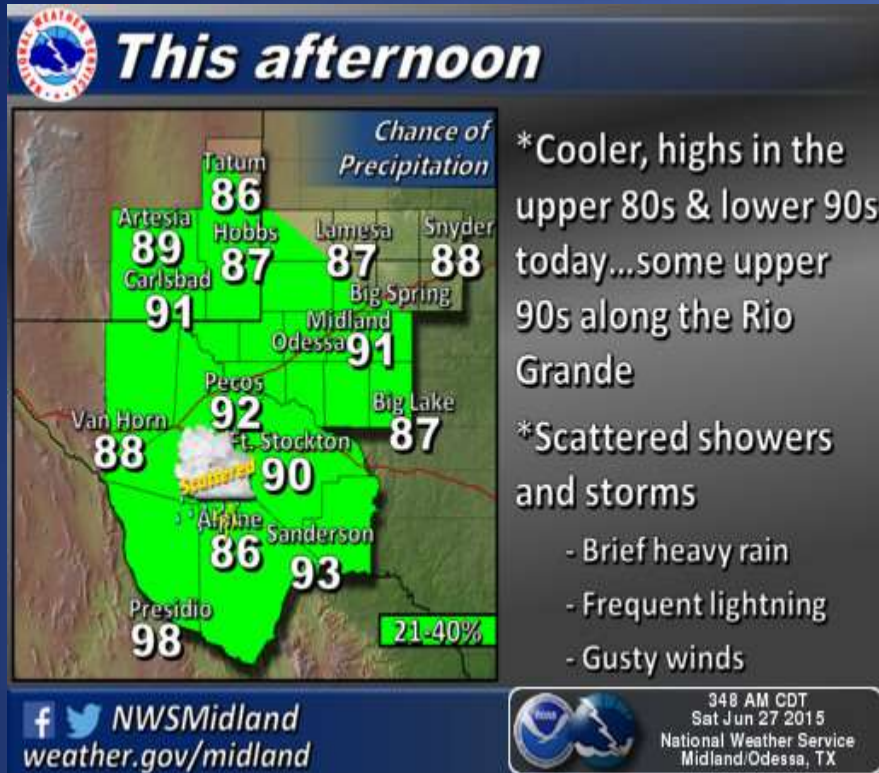

946 PM MDT  
Fri Jun 26 2015  
National Weather Service  
El Paso, TX

Moist, unstable airmass will persist across the Borderland on Saturday. Combined with a weak cold front pushing in from the east, expect scattered thunderstorms to develop across the area. A few of the thunderstorms could produce heavy rain and local flooding. Temperatures will be a bit below normal.

# Hazardous Weather

Cooler today, but scattered storms will still be possible, especially south and west of the Pecos River.

Scattered to numerous showers and storms are expected today as a cold front stalls across the area. Some of this activity could be strong with small hail and gusty winds. Locally heavy rainfall will also be possible.

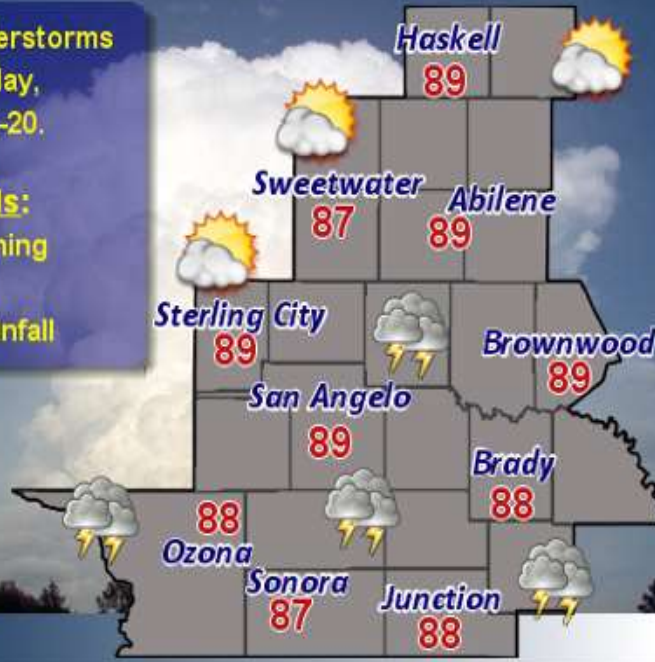

# Hazardous Weather

## Scattered Thunderstorms Today

Scattered thunderstorms are expected today, mainly south of I-20.

### Primary hazards:

Dangerous lightning  
Gusty winds  
Locally heavy rainfall

National Weather Service San Angelo, TX Updated: Jun 27 4:57 AM

A slow-moving cold front will cross West Central Texas today. Scattered showers and thunderstorms will develop throughout the afternoon hours, mainly south of Interstate 20. Severe weather is not anticipated. However, the stronger thunderstorms will produce frequent lightning, gusty winds, and locally heavy rainfall. Expect afternoon temperatures in the upper 80s.

## Today

- Showers & thunderstorms possible along & ahead of a weak cold front today
- Slight Chance (20%)
- Chance (30-50%)
- Likely (60-70%)
- Stronger storms capable of locally heavy rain and strong wind gusts

### Forecast Highs

455 AM CDT  
Sat Jun 27 2015

National Weather Service  
Houston/Galveston, TX

A weak cold front will approach Southeast Texas today, stalling north of Interstate 10. Showers and thunderstorms will be possible along and ahead of this cold front with stronger storms capable of locally heavy rain and strong wind gusts. Rain chances are expected to linger into the overnight hours.

# Hazardous Weather

A weak cold front will move south of I-20 today, then slow down somewhere across central Texas. Best rain chances will be along and ahead of the front, across central Texas. Main threats today with stronger storms will be gusty winds, frequent lightning, and locally heavy rain and minor flooding. Highs will be generally between 85 and 90 degrees, which is slightly below normal for late June.

# Hazardous Weather

## Day 1 Weather Hazards

Valid: 0800 Sat - 0800 Sun

A few strong storms with heavy rainfall possible today

A few strong thunderstorms possible this afternoon/evening; gusty winds are the main threat

|  |                                   |
|--|-----------------------------------|
|  | Very Common – Happens Often       |
|  | Common – Happens Frequently       |
|  | Uncommon – A Few Times a Year     |
|  | Rare – Once Every 1-5 Years       |
|  | Very Rare – Once Every 5-10 Years |

\*Threat levels are based on FEMA Region 6 criteria. State or local threat level criteria may differ.
